2.0 PROJECT INFORMATION

IMPORTANT: If project is multi-jurisdictional in nature, information must be <u>consolidated</u> for completion of this section.

- 2.1 PROJECT NAME: Spring Grove Ave. Bridge Replacement over the Millcreek, East of Kings Run Drive
- 2.2 BRIEF PROJECT DESCRIPTION (Sections A through D):
 A. SPECIFIC LOCATION:

Spring Grove Ave. Bridge over the Millcreek, 230' East of Kings Run Drive

B. PROJECT COMPONENTS:

This project involves removing the single span steel truss bridge, concrete deck and substructure, and replacing it with a two-span continuous steel beam bridge with a new reinforced concrete deck and substructure. Other removal and replacement work includes the approach slabs, approach curbs and sidewalks. One new pier will be constructed in the Millcreek.

C. PHYSICAL DIMENSIONS/CHARACTERISTICS:

Existing Length = 172'-0"Existing Width = 54'-0" (38'-0" curb to curb with 2-8'-0" walks Proposed Length = 181.05'Proposed Width = 74'-4" (60'-0" curb to curb with 2-6'-0" walks)

D. DESIGN SERVICE CAPACITY:

IMPORTANT: Detail shall be included regarding current service capacity vs proposed servic level. If road or bridge project, include ADT. If water or wastewater project include current residential rates based on monthly usage of 7,756 gallons perhousehold.

The existing bridge width is inadequate. Although the existing bridge width is striped for four (4), 9'-6" lanes, due to the volume of truck traffic, the bridge is used primarily as a two-lane bridge. The proposed bridge width will consist of four (4) 12'-0" lanes with two (2) 6'-0" shoulders for a width of sixty (60) feet to nearly match the approach width on both sides of the bridge.

1992 ADT = 12,851 veh./day 2012 ADT = 19,430 veh./day

2.3 REQUIRED SUPPORTING DOCUMENTATION

(Photographs/Additional Description; Capital Improvements Report; Priority Lis 5-year Plan; 2-year Maintenance of Effort report, etc.) Also discuss the number of temporary and/or fulltime Jobs which are likely to be created as a result of this project. Attach Pages. Refer to accompanying instructions for furthe detail.

3.0 PROJECT FINANCIAL INFORMATION

3.1 PROJECT ESTIMATED COSTS (Round to Nearest Dollar):

a)	Project Engineering Costs: 1. Preliminary Engineering	\$	N/A
	2. Final Design	ŝ	N/A
	3. Construction Supervision	\$_	N/A
b)	Acquisition Expenses	_

5.0 APPLICANT CERTIFICATION

The Applicant Certifies That:

As the official representative of the Applicant, the undersigned certifies that: (1) he/she is legally empowered to represent the applicant in both requesting and accepting financial assistance as provided under Chapter 164 of the Ohio Revised Code and 164-1 of the Ohio Administrative Code; (2) that to the best of his/her knowledge and belief, all representations that are a part of this application are true and correct; (3) that all official documents and commitments of the applicant that are a part of this application have been duly authorized by the governing body of the Applicant; (4) and, should the requested financial assistance be provided, that in the execution of this project, the Applicant will comply with all assurances required by Ohio law, including those involving minority business utilization, Buy Ohio, and prevailing wages.

IMPORTANT: Applicant certifies that physical construction on the project as defined in this application has not begun, and will not begin, until a Project Agreement on this project has been issued by the Ohio Public Works Commission. Action to the contrary is evidence that OPWC funds are not necessary to complete this project.

IMPORTANT: In the event of a project cost underrun, applicant understands that the identified local match share (sections 3.2(a) through 3.2(c) will be paid in full toward completion of this project. Unneeded OPWC funds will be returned to the funding source from which the project was financed.

Gerald Newframer, City Manager

Certifying Representative (Type Name and Title)

<u>X</u>		82 h Jan

Applican applicati	it shall on:	check each of the statements below, confirming that all required information is included in this
<u>X</u>		A <u>five-year Capital improvements</u> Report as required in 164-1-31 of the Ohio Administrative Code and a <u>two-year Maintenance of Local Effort Report</u> as required in 164-1-12 of the Ohio Administrative Code.
<u> </u>		A registered professional engineer's estimate of useful life as required in 164-1-13 of the Ohlo Administrative Code. Estimate shall contain engineer's <u>original seal and signature</u> .
<u>X</u>		A registered professional engineer's estimate of cost as required in 164-1-14 and 164-1-16 of the Ohio Administrative Code. Estimate shall contain engineer's <u>original seal and signature</u> .
<u> </u>	٠	A certified copy of the legislation by the governing body of the applicant authorizing a designated official to submit this application and to execute contracts.
×	YES N/A	A copy of the cooperation agreement(s) (for projects involving more than one subdivision or district).
X	YES N/A	Copies of all invoices and warrants for those items identified as "pre-paid" in section 4.4 of this application.

6.0 DISTRICT COMMITTEE CERTIFICATION

The District Integrating Committee for District Number Certifies That:
As the official representative of the District Public Works Integrating Committee, the undersigned hereby certifies: that this application for financial assistance as provided under Chapter 164 of the Ohio Revised Code has been duly selected by the appropriate body of the District Public Works Integrating Committee; that the project's selection was based entirely on an objective, District-oriented set of project evaluation criteria and selection methodology that are fully reflective of and in conformance with Ohio Revised Code Sections 164.05, 164.06, and 164.14, and Chapter 164-1 of the Ohio Administrative Code; and that the amount of financial assistance hereby recommended has been prudently derived in consideration of all other financial resources available to the project. As evidence of the District's due consideration of required project evaluation criteria, the results of this project's ratings under such criteria are attached to this application.
William W. Brayshaw, Chairman, District 2 Integrating Committee
Certifying Representative (Type Name and Title)

SUBJECT: SPRING GROVE AVENUE BRIDGE REPLACEMENT OVER THE MILLCREEK,

EAST OF KINGS RUN DRIVE

CERTIFICATION OF USEFUL LIFE OF ISSUE II OPWC PROJECTS

As required by Chapter 164-1-13 of the Ohio Administrative Code. I hereby certify that the design useful life of the subject bridge replacement project is at least twenty (20) years.

THOMAS E.

THOMAS E.

YOUNG
TO 26962

(Seal)

T. E. Young, P.E. City Engineer City of Cincinnati

SCOPE

For furnishing all the materials, labor and equipment and performing all work necessary for the replacement of the Spring Grove Avenue Bridge over the Millcreek in accordance with the Plans, Specifications, and as directed by the Engineer.

QUANTITIES

It is understood that the quantities are approximate only and in no way shall govern the amount required during the contract period. The estimated quantities shall be used solely for the purpose of making a tabulation of the bids.

Where LUMP SUM is indicated, insert the complete price for Labor and Materials for performing all work under the Item. Where UNITS are shown, insert the price PER UNIT for Labor and for Materials.

BRIDGE INSPECTION REPORT

CONDITION RATINGS

INDIVIDUAL ITEMS

- 1. Good Condition No repair required
- Fair Condition Minor deficiency, item still functioning as designed.
- Poor Condition Major deficiency, item in need of repair to continue functioning as designed.
- Critical Condition Item no longer functioning as designed.

GENERAL APPRAISAL AND OPERATIONAL STATUS - PART I

- 9. As Built Condition
- 8. Very Good Condition No problems noted
- 7. Sood Condition Some minor problems
- 6. Satisfactory Condition Structural elements show some minor deterioration.
- 5. Fair Condition All primary structural elements are sound, but may have minor section loss, cracking, or spalling. Secondary elements may have significant deterioration.
- Poor Condition Advanced section loss, deterioration or spalling
- 3. <u>Serious Condition</u> loss of section, deterioration, or spalling have seriously affected primary structural components. Local failures are possible. Fatigue cracks in steel or shear cracks in concrete may be present.
- 2. <u>Critical Condition</u> Advanced deterioration of primary structural elements. Fatigue cracks in steel or shear cracks in concrete may be present. Bridge should be closed, or closdely monitored, until corrective action is taken.
- 1. "Imminent" Failure Condition Major deterioration or section loss present in critical structural components. Bridge is closed to traffic but corrective action may be put back in light service.
- Failed Condition Out of service beyond corrective action.

SUMMARY ITEMS

- 9. New Condition
- B. Good Condition
- 7. Generally Good Condition
- 6. Fair Condition
- 5. Generally Fair Condition
- 4. Marginal Condition
- 3. Poor Condition
- 2. Critical Condition
- 1. Critical Condition
- O. Critical Condition

GENERAL APPRAISAL AND OPERATIONAL STATUS - PART II

- A. Open, no Restriction.
- B. Open, posting recommended but not legally implemented (all signs not in place).
- D. Open, would be posted or closed except for temporary shoring, etc. to allow for unrestricted traffic.
- E. Open, temporary structure in place to carry legal loads while original structure is closed and awaiting replacment or rehab.
- G. New structure, not yet open to traffic
- K. Bridge closed to all traffic.
- P. Posted for load (may include other restrictions)
- R. Posted for other load-capacity restrictions (speed, number of vehicles on bridge, etc.).

EXHIBIT A

February 24, 1992

Mr. Donald C. Schramm, P.E., P.S. Hamilton County Engineer 700 County Administration Building 138 East Court Street Cincinnati, Ohio 45202

ATTENTION: Mr. Steve Mary

Dear Mr. Schramm:

SUBJECT: SPRING GROVE AVE. BRIDGE OVER THE MILLCREEK, E. OF KINGS RUN DRIVE REDUCED POSTING

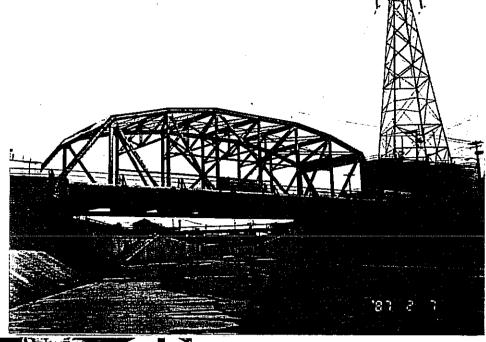

The City of Cincinnati has analyzed the Spring Grove Avenue Bridge over the Millcreek using the ODOT BARS bridge analysis and recommends that the bridge be posted for a maximum gross vehicle weight of 36 tons.

Please proceed with those steps necessary to execute a resolution journalizing the 36 Ton Gross Vehicle Weight Limit signage for the requested structure.

If you have any additional questions regarding this letter please call Brian Pickering at 352-2452.

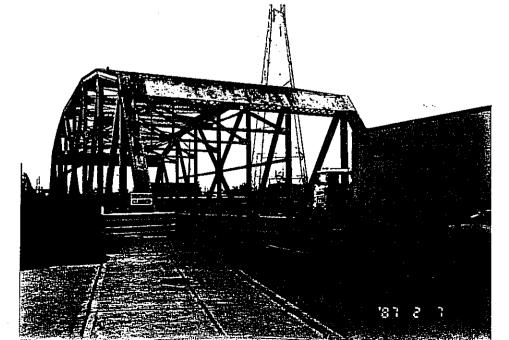

Sincerely.

T.E.Young, P.E. City Engineer

Corroded Steel Beam

ADDITIONAL SUPPORT INFORMATION

For Fiscal Year 1993, jurisdictions shall complete the State application form for Issue 2, Small Government, or Local Transportation Improvement Program (LTIP) funding. In addition, the District 2 Integrating Committee requests the following information to determine which projects are funded. Information provided on both forms should be accurate, based on reliable engineering principles. Do NOT request a specific type of funding desired, as this is decided by the District Integrating Committee.

1.	of t	he	total	infr	astruc	tur	e wit	thin	the j	juris	dicti	on whi	ch is	simi:	lar

2. What is the condition of the existing infrastructure to be replaced, repaired, or expanded? For bridges, submit a copy of the latest general appraisal and condition rating.

Closed	 Poor	X
Fair	 Good	

Give a brief statement of the nature of the deficiency of the present facility such as: inadequate load capacity (bridge); surface type and width; number of lanes; structural condition; substandard design elements such as berm width, grades, curves, sight distances, drainage structures, or inadequate service capacity. If known, give the approximate age of the infrastructure to be replaced, repaired, or expanded.

See attached page	la.

If State Issue 2 funds are awarded, how soon (in weeks or mafter completion of the agreement with OPWC would the opening occur? The Integrating Committee will be reviewing scheduletield for previous projects to help judge the accuracy particular jurisdiction's anticipated schedule. 6 months	of bids medules my of a
Please indicate the current status of the project developed circling the appropriate answers below. PROVIDE ACCURATE ESTIMATE	ent by
a) Has the Consultant been selected? Yes No	N/A
b) Preliminary development or engineering completed? Yes No	N/A
c) Detailed construction plans completed? Yes	N/A

health, welfare, and safety of the service area? (Typical exinclude the effects of the completed project on accident emergency response time, fire protection, health hazards benefits, and commerce.) See Page 1a For any project involving GRANTS, the local jurisdiction must a MINIMUM OF 10% of the anticipated construction Additionally, the local jurisdiction must pay 100% of the compreliminary engineering, inspection, and right-of-way. If a pis to be funded under Issue 2 or Small Government, the costs betterment/expansion are 100% local. Local matching funds must be currently on deposit with the jurisdiction, or certified as been approved or encumbered by an outside agency (MRF, CDBG, Proposed funding must be shown on the Project Application Section 3.2, "Project Financial Resources". For a project in LOANS or CREDIT ENHANCEMENTS, 100% of construction costs are experienced.	provide cost. of any either having etc.). In under volving ligible

20%

ADDITIONAL SUPPORT INFORMATION

2. The existing bridge lacks adequate load-carrying capacity due to its deteriorated condition. Severe corrosion with significant section loss exists on all components of the steel structure. The sidewalks are severely deteriorated on the north and south due to concrete spalling. As a result, the north walk has been closed, and the south walk has been temporarily repaired.

The roadway width narrows from approximately sixty (60) feet on the approaches to four (4) narrow, nine-and-a-half (9'-6") lanes without any berm width. Also, the above-grade steel truss and sidewalk railing, with the narrow, curved roadway alignment combine to minimize the site distance for vehicles crossing the bridge.

The Spring Grove Avenue Bridge is sixty-five (65) years old.

4. The existing structure is too narrow and the end posts are a traffic hazard. Due to the extensive deterioration, the structure will be posted for reduced loads. The posting will have an impact on truck traffic since the surrounding area is industrial. The new structure will handle all legal loads and four (4) 12'-0" lanes with proper berm width. The proposed steel superstructure will be located below the roadway eliminating safety hazards.

6. Has any formal action by a federal, state, or local government agency resulted in a complete ban or partial ban of the use or expansion of use for the involved infrastructure? (Typical examples include weight limits, truck restrictions, and moratoriums or limitations on issuance of new building permits.) THE BAN MUST HAVE AN ENGINEERING JUSTIFICATION TO BE CONSIDERED VALID. Attach a copy of the document (ordinance, resolution, etc.) which imposes the ban.

COMPLETE	BAN	PARTIAL	BAN	x*	NO	BAN	
							

- will the ban be removed after the project is completed? YES NO
 * The City is in the process of posting a load restriction on the
 structure subject to approval by HAM County Commissioners. See Exhib. A
- 7. What is the total number of existing users that will benefit as a result of the proposed project? Use specific criteria such as households, traffic counts, ridership figures for public transit, daily users, etc., and equate to an equal measurement of users:

ADT = 12,851 veh./day USERS = 15,421 occupants/day

For roads and bridges, multiply current <u>documented</u> Average Daily Traffic by 1.2 occupants per car (I.T.E. estimated conversion factor) to determine users per day. Ridership figures for public transit <u>must be documented</u>. Where the facility currently has any restrictions or is partially closed, use documented traffic counts prior to restriction. For storm sewers, sanitary sewers, water lines, and other related facilities, multiply the number of households in the service area by four (4) to determine the approximate number of users per day.

8. The Ohio Public Works Commission requires that all jurisdictions applying for project funding develop a five year overall Capital Improvement Plan that shall be updated annually. The Plan is to include an inventory and condition survey of existing capital improvements, and a list detailing a schedule for capital improvements and/or maintenance. Both Five-Year Overall and Five-Year Issue 2 Capital Improvement Plans are required.

Copies of these Plans are to be submitted to the District Integrating Committee at the same time the Project Application is submitted.

9. Is the infrastructure to be improved part of a facility that has regional significance? (Consider the number of jurisdictions served, size of service area, trip lengths, functional classification, and length of route.) Provide supporting information.

Yes, the Spring Grove Ave. Bridge has tremendous regional impact linking the City of Cincinnati with Hamilton County. The road is classified as a major arterial on the Federal Aid Urban System, and carries considerable truck traffic from several nearby large industries.

OHIO INFRASTRUCTURE BOND PROGRAM (ISSUE 2) - ROUND 5

LOCAL TRANSPORTATION IMPROVEMENT PROGRAM (LTIP) - ROUND 4

FY 1993 PROJECT SELECTION CRITERIA - 7/1/92 TO 6/30/93

ADOPTED BY DISTRICT 2 INTEGRATING COMMITTEE, 2/21/92

JURISDI	CTION,	AGENCY: CITY OF CINCINALATI
		rification:
	PR11	VE GROVE AVENUE BRIDGE OVER
_		CREEK PIPG
PROPOSEI	FUND	PING:
8	0/	20
ELIGIBLE		
		(27/10
<u>POINTS</u>		TOTAL POINTS FOR THIS PROJECT -
10	1)	Type of project
		10 Points - Bridge, road, stormwater 5 Points - All other projects
0	2)	If Issue 2/LTIP funds are granted, when would the construction contract be awarded? (Even though the jurisdictions will be asked this question, the Support Staff will assign points based on engineering experience.)
		10 Points - Will definitely be awarded by end of 1992 5 Points - Some doubt as to whether it can be awarded by end of 1992 o Points - No way it can be awarded in 1992
15	3)	What is the condition of the infrastructure to be replaced or repaired? For bridges, base condition on latest general appraisal and condition rating.
		15 Points - Poor condition 12 Points - 9 Points - Fair to Poor condition 6 Points - 3 Points - Fair condition
	NOTE will	: If infrastructure is in "good" or better condition, it NOT be considered for Issue 2/LTIP funding, unless it is a

betterment project that will improve serviceability.

- 4) If the project is built, what will be its effect on the facility's serviceability?
 - 10 Points Significantly effect on serviceability (e.g., widen to add lanes along entire project)
 - 8 Points Moderate to significant effect on serviceability
 - 6 Points Moderately effect on serviceability (e.g., widen existing lanes)
 - 4 Points Little to no effect on serviceability
 - 2 Point Little or no effect on serviceability (e.g., street or bridge deck rehab)
- 5) Of the total infrastructure within the jurisdiction which is similar to the infrastructure of this project, what portion can be classified as being in poor or worse condition, and/or inadequate in service?
 - 3 Points 50% and over
 - 2 Points 30% to 49.9%
 - 1 Point 10% to 29.9%
 - 0 Points Less than 10%

- 6) How important is the project to the HEALTH, SAFETY, and WELFARE of the public and the citizens of the District and/or the service area?
 - 10 Points Highly significant importance, with substantial impact on all 3 factors
 - 8 Points Considerably significant importance, with substantial impact on 2 factors OR noticeable impact on all 3 factors
 - 6 Points Moderate importance, with substantial impact on 1 factor or noticeable impact on 2 factors
 - 4 Points Minimal importance, with noticeable impact on 1 factor
 - 2 Points No measurable impact

SAFETY

7)

HEALTH - EMERGENCY RUNS TO NOSP.
What is the overall economic health of the jurisdiction?

- 10 Points Poor
- 8 Points -
- 6 Points Fair
- 4 Points -
- 2 Points Excellent

8) What matching funds are being committed to the project, expressed as a percentage of the TOTAL CONSTRUCTION COST? Matching funds may be local, federal, ODOT, MRF, etc. or a combination of funds. Loan and credit enhancement projects automatically receive 5 points. MINIMUM 10% MATCHING FUNDS REQUIRED FOR GRANT-FUNDED PROJECTS

- 5 Points More than 50%
- 4 Points 40% to 49.9%
- 3 Points 30% to 39.9%
- 2 Points 20% to 29.9%
- 1 Point 10% to 19.9%

<u>5 *</u> 9) * KNOWB

Has any formal action or orders by a federal, state, or local governmental agency resulted in a partial or complete ban of the usage or expansion of the usage for the involved infrastructure? Examples include weight limits on structures, EPA orders to replace or repair sewerage, and moratoriums on building permits in a particular area due to local flooding downstream. POINTS CAN BE AWARDED ONLY IF CONSTRUCTION OF THE PROJECT BEING RATED WILL CAUSE THE BAN TO BE REMOVED.

- 10 Points Complete ban
- 5 Points Partial ban
- 0 Points No ban

10) What is the total number of existing daily users that will benefit as a result of the proposed project? Appropriate criteria include traffic counts & households served, when converted to a measurement of persons. Public transit users are permitted to be counted for roads and bridges, but only when certifiable ridership figures are provided.

- 10 Points 10,000 and Over
- 8 Points 7,500 to 9,999
- 6 Points 5,000 to 7,499
- 4 Points 2,500 to 4,999
- 2 Points 2,499 and Under

11) Does the infrastructure have REGIONAL impact? Consider originations & destinations of traffic, functional classification, size of service area, number of jurisdictions served, etc. (Functional classifications to be revised in the future to conform to new Surface Transportation Act.)

- 5 Points Major impact (e.g., major multi-jurisdictional route, primary feed route to an Interstate, Federal-Aid Primary routes)
- 4 Points -
- 2 Points -
